

Offshore Northern Gabon

Port Gentil Basin: Pre-Salt Carbonate Mound Play

Opportunity to unlock potentially large oil potential in an undrilled pre-Salt carbonate play offshore Northern Gabon

Technical Overview:

- Only 5 Pre-Salt wells drilled in 75,000 km² acreage
- Previous exploration of Pre-Salt targets by others based on sound play modeling, but new work shows focus was in wrong area
- Proven pre-Salt Play Analogues confirmed to south offshore Congo & Cabinda/Kwanza plus trans-Atlantic by Brazilian Santos-Campos basin fields
- Old 2D data shows undrilled leads with 250 - 750 MMboe resource potential in open acreage

Forward Programme:

- Sign CA & NCA with prospect generator to access detailed report and evaluation
- Licence application based on 3D data acquisition

Value:

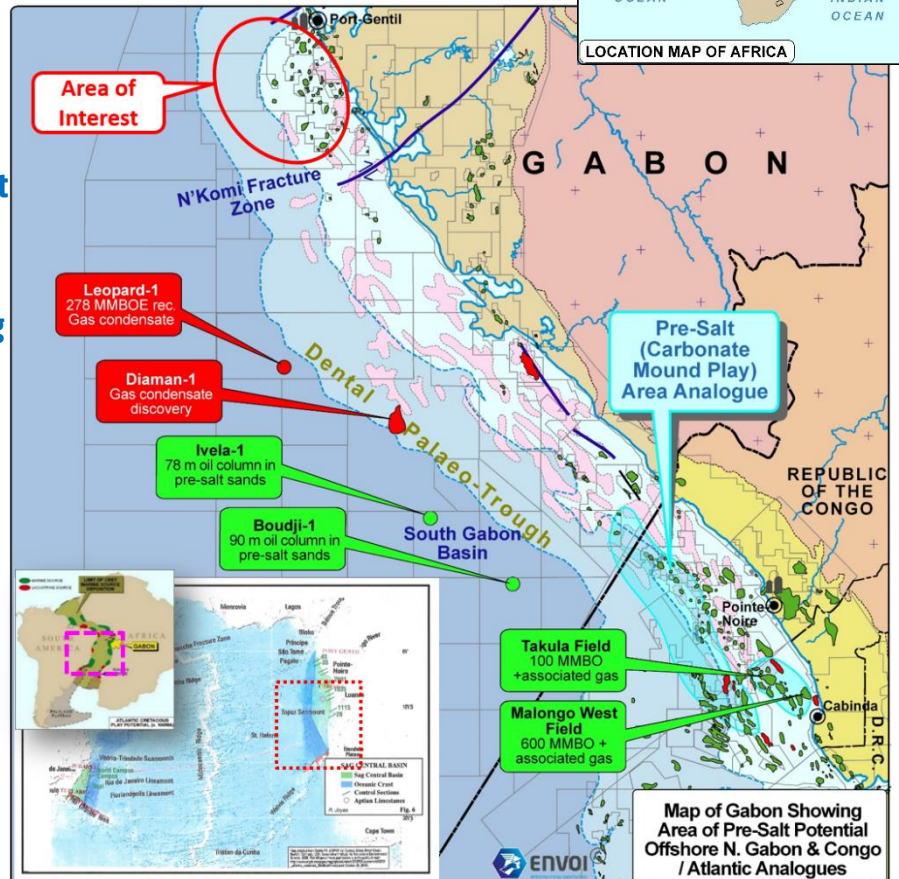

- **Short Circuit review & evaluation of highly prospective undrilled play with a view to new offshore Licence application**

OPPORTUNITY: Opportunity to access detailed technical insight into new, largely undrilled play in proven hydrocarbon province in return for negotiated carry through application and work programme.

Additional Information: Introduction to Envoi's Client for discussions about the opportunity and access to the CA & NCA can be arranged exclusively through Envoi Limited
